

MILESTONE UPDATE

ARETE's Industrial Portfolio Reaches 100% BREEAM Certification

Continue
Reading

ARETE has reached a portfolio-wide milestone

Every industrial building it holds is currently BREEAM-certified.

With the certification of the last remaining asset in June, the entire industrial portfolio of over 319,000 m² GLA across 11 locations in Central and Eastern Europe carries an international BREEAM rating based on various sustainability factors.

59 % of GLA is now certified at level „Excellent“, demonstrating ARETE’s commitment to responsible asset management. Our assets typically include relaxation areas for tenants, energy efficiency measures to reduce operational costs and green or blue infrastructure for local cooling and habitat protection.

Reaching full certification across the portfolio is, above all, a credit to the people behind it.

The result reflects a decade of work by ARETE’s teams, cooperating closely with tenants and assessors. We are proud of the standard our team and partners have set for how the portfolio is managed going forward.
